

MYO MUNCHEETM
SMALL DEVICE BIG IMPACT

**Does your
child need a
Munchee?**

**Signs your child may benefit
from using a Munchee:**

- ✓ Issues with dribbling & drooling
- ✓ Mouth breathing in the daytime or during sleep
- ✓ Messy eating
- ✓ Misaligned teeth
- ✓ Ear and sinus congestion
- ✓ Teeth clenching and grinding

Why Munchee?

An amazingly powerful little tool that will improve oral tone for optimal chewing, breathing, speech, sleep and health.

Chewing is essential for the development of the jaw, palate and facial structures in children.

Primitive cultures were chewing on nuts, seeds, bones and raw vegetables – which was good exercise for the jaw and stimulated bone growth.

Sadly, the modern processed diet requires little chewing effort.

Using a Myo Munchee promotes healthy development of facial muscle strength and encourages nose breathing.

*Chewing, swallowing
and movement has
been outsourced...*

UNTIL NOW!

Enjoyable

It's a therapy that your child can enjoy! Using a Myo Munchee can become a point of family connection and fun. Reading time can also be Munchee time... making healthy habits fun!

Adaptable

Using a Myo Munchee is easily adaptable into the child's personalised treatment plan. Munchees are used and recommended by a broad spectrum of allied health practitioners and therapists.

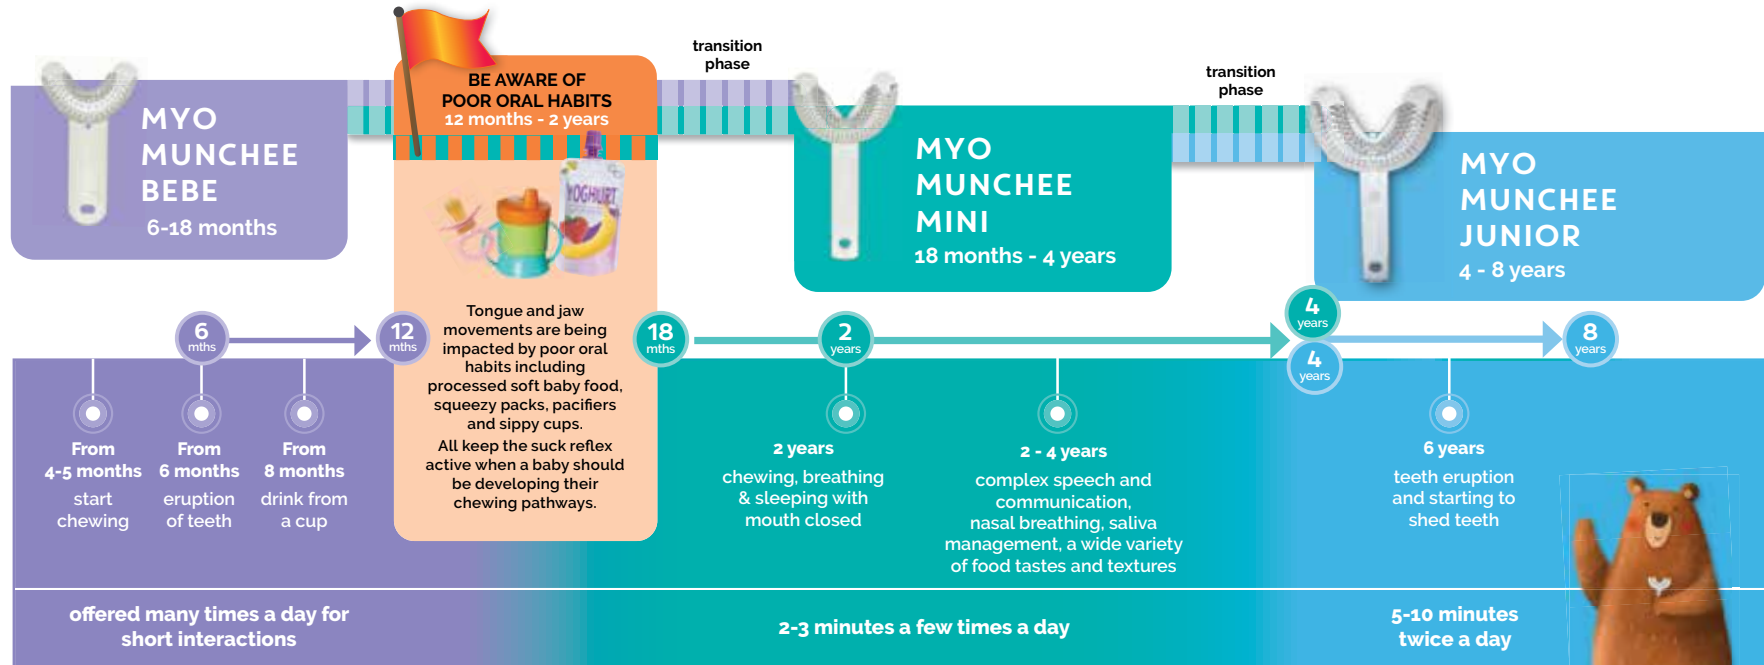

Affordable

A small price tag for a cascade of benefits. Intervene before expensive, corrective approaches may be necessary.

SMALL DEVICE, BIG IMPACT... *with benefits that last for life!*

Chewing every day will assist with growth and development of the jaw, mouth and face.

- ✓ **The Munchee** enhances muscle strength, tone and coordination for better oral posture.
- ✓ **The Munchee** promotes nasal breathing, oral coordination & reinforces correct swallow patterns.
- ✓ **The Munchee** encourages chewing, stimulating saliva production and the prong design assists in cleaning the teeth and massages the gums.

Empowering people for better health

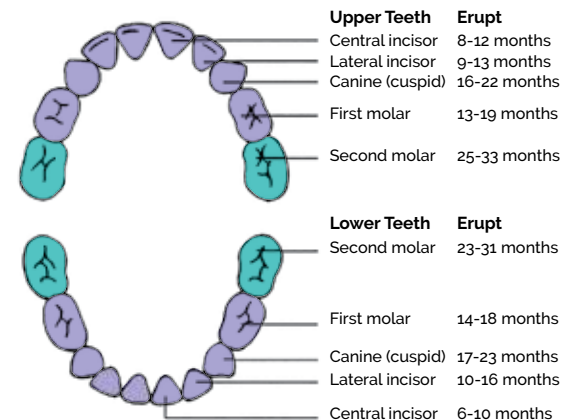

Our modern world is straining under the burden of preventable health problems. What if we connected the dots around chewing, breathing, sleeping and health?

What if there was a more simple and more natural way that brought together children, adults and clinicians to collaborate around improved health?

Our long-term vision is to optimise children's genetic potential for generations to come.

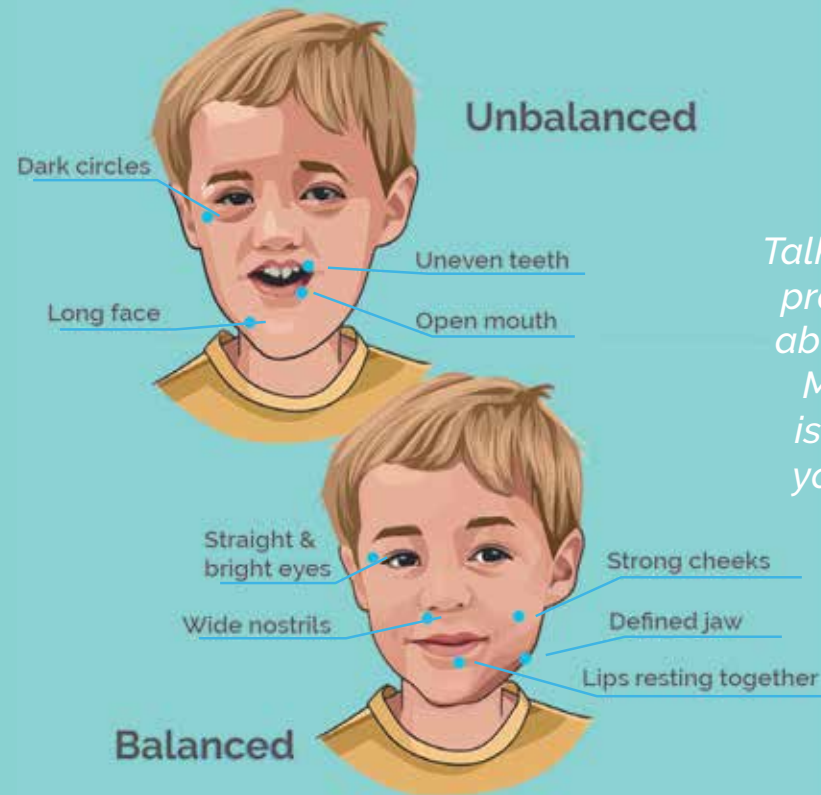

That's the ***Munchee movement!***

Teeth Eruption Chart 6 months to 4 years of age

What does ideal oral posture and function look like?

- Lips closed, nose breathing and tongue positioned on the roof of the mouth at rest.
- Eating, drinking, chewing, swallowing and breathing should all be managed with the mouth closed.
- Speech is clear and age appropriate.
- Saliva is swallowed and well controlled.
- Teeth are aligned and jaws are balanced.

Talk with your practitioner about which Munchie is right for your child.
