

MUNCHEE

SMALL DEVICE BIG IMPACT

DOES MY CHILD NEED A MUNCHEE?

What are the signs that your child may benefit from using a Munchee?

- Issues with dribbling and drooling
- Mouth breathing in the daytime or during sleep
- Messy eating at the dinner table
- Misaligned teeth
- Difficulty concentrating
- Teeth clenching and grinding
- Thumb sucking or pacifier use

The natural growth forces generated from correct chewing make a big contribution to growing faces. Chewing has been linked to facial development, correct swallow, normal digestion and even concentration and memory.

Munchee's active chewing helps get the body's natural chewing function on track!
